PROFESSIONAL SUMMARY

Computer Science undergraduate with strong foundations in data structures, algorithms, and software design. Experienced in developing end-to-end software applications using Java, Python, C, and modern web technologies. Hands-on experience in machine learning, data analysis, and backend development. Passionate about building scalable, reliable, and efficient solutions to solve real-world problems.

EDUCATION

Bachelor of Technology, Vidya Jyothi Institute of Technology (VJIT)

2023-2027

Computer Science and Engineering

CGPA : 9.48

MPC, Sri Chaitanya Junior College

2021 – 2023

Himayat Nagar, Hyderabad

Percentage : 98.1

SSC, Gowtham Model School

2020-2021

Kishanbagh, Hyderabad

CGPA: 10.0

SKILLS

Programming Languages: Java, Python, C, SQL

Web Technologies: HTML, CSS, JavaScript

Frameworks & Tools: Flask, Supabase, Git, GitHub

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, Complexity Analysis

AI / Machine Learning: Pandas, NumPy, Matplotlib, Random Forest

Soft Skills: Leadership, Teamwork, Communication

INTERNSHIPS & TRAINING

Salesforce Developer Virtual Program/Salesforce

May – July(2025)

Completed the Salesforce Developer Virtual Program and earned multiple Trailhead badges by building and customizing Salesforce applications.

- Configured objects, fields, validation rules, and automation workflows
- Gained hands-on experience in CRM customization and cloud-based application development

AI-ML Virtual Internship / Eduskills

July – September(2025)

Completed a virtual internship focused on Artificial Intelligence and Machine Learning applications.

- Worked on ML model implementation and data preprocessing techniques
- Gained practical exposure to real-world AI problem-solving workflows

PROJECTS

SkillTrade – Skill Bartering Platform

- Developed a web-based platform that enables users to exchange skills through a barter-based system instead of monetary transactions.
- Implemented real-time chat functionality to enable seamless user communication
- Designed backend logic for user matching and skill exchange workflows
- Tech Stack: Python, HTML, CSS, JavaScript, SQL

Forest Fire Prediction and Simulation System

- Developed a machine learning model to predict forest fire probability using weather and GIS data, along with a simulation to visualize fire spread over time.
- Implemented a Random Forest model for fire risk prediction
- Built a fire propagation simulation to analyze potential spread patterns
- Tech Stack: Python, Pandas, NumPy, Matplotlib, Scikit-learn

Driver Drowsiness Detection System

- Built a real-time driver monitoring system using computer vision to detect fatigue by eye closure and head posture.
- Designed a multi-condition alert mechanism for prolonged eye closure and head nodding events
- Achieved real-time performance using optimized video processing techniques
- Tech Stack: Python, OpenCV, dlib, NumPy, SciPy, Pygame
